

# USCON Voz de la Construcción Announces New Group Health Insurance Agreement with Primary Care Insurance Solutions

*USCON Voz de la Construcción to Bring Affordable Health Insurance to Concrete and Construction-Related Companies through an exclusive agreement with PCIS*

HOUSTON, TX, UNITED STATES,  
September 16, 2024 /

EINPresswire.com/ -- USCON [Voz de la Construcción](#), one of Texas' largest construction associations, announced today a new group health insurance agreement with Primary Care Insurance Solutions (PCIS). They are now responsible for supplying and coordinating all group health insurance options for USCON 1000-plus employers throughout the state, offering cost-effective insurance options and raising awareness within the Spanish-speaking business community.

"We are proud to have been selected as their group health insurance benefits provider for USCON ," says [Dustin Neider](#), President of PCIS. "It's exciting to help save their hard-working employees on health care costs while giving them access to the healthcare they deserve."

USCON serves as the worker's voice and works to strengthen the US construction industry, economy, and workforce. Its primary focus is inspiring growth among its members, and through this partnership with PCIS, it hopes to continue to grow.

PCIS focuses on filling this industry's gaps with its new customized group plan solution.

PCIS plans to expand USCON members' access to preventative blood work that can be conducted at the employer's office. This will simplify seeking the care employees require before a serious illness occurs.

Preventative care saves lives and saves employers' productivity and healthcare costs, including expensive insurance premiums.

Neider reports "that this new exclusive plan includes FREE 24/7 [telemedicine](#) with personalized consultation within 15 minutes of contacting a professional for both English and Spanish-

speaking employees”.

“The construction industry involves long working hours and is physically very labor-intensive. We built USCON group health insurance plan around that knowledge. So, instead of a traditional plan with only limited, sometimes inconvenient, office hours applied, we included telemedicine automatically, allowing employees easy, personalized access to the care they need, when they need it.”, Neider comments.

Quality healthcare is available through various network plan options, including traditional PPO's, HSAs, and direct care options, and will save USCON members significant money while strengthening the health of its workforce.

The partnership between PCIS, USCON, and Voz de la Construcción is effective immediately. For more information about PCIS, please visit [PrimaryCareins.com](http://PrimaryCareins.com)
