

# My Care Labs Expands Services with New UTI Testing

## Targeting Senior and Vulnerable Communities

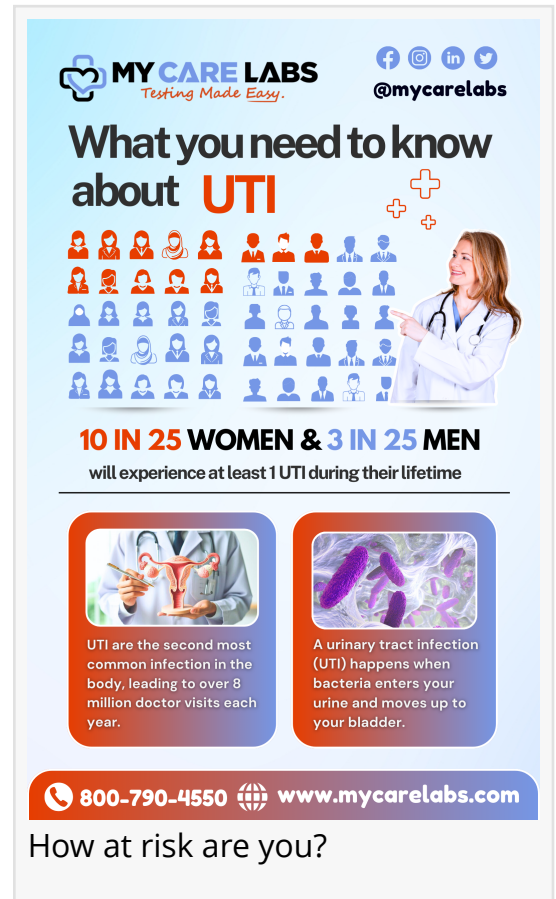

FREMONT, CA, UNITED STATES, September 16, 2024 /EINPresswire.com/ -- [My Care Labs](#), a trusted provider of diagnostic services in California, is excited to announce the upcoming launch of their new Urinary Tract Infection (UTI) testing services. This vital testing, set to roll out in October, will provide rapid, reliable results within 24-48 hours, ensuring that patients receive timely and accurate diagnoses to prevent further complications. Our [UTI testing](#) will be covered by all major insurances, including [MediCare and MediCal](#), as we continue our mission to provide accessible, affordable, and comprehensive healthcare services to all communities, especially the elderly.

## Understanding the Importance of UTI Testing

Urinary Tract Infections are a significant health concern, particularly for elderly individuals and those in care facilities. According to the National Institutes of Health (NIH), UTIs are among the most common bacterial infections, affecting nearly 50-60% of women at least once in their lifetimes and accounting for 10% of hospital admissions in elderly populations. In long-term care facilities, UTIs are the most common type of bacterial infection, contributing to significant discomfort, increased healthcare costs, and in severe cases, life-threatening complications such as sepsis.

For the elderly and individuals with weakened immune systems, early detection and treatment of UTIs are crucial. Symptoms of UTIs, such as confusion or weakness, can often be mistaken for other ailments in seniors, making routine testing and quick diagnosis a priority. Delayed or untreated infections can lead to kidney damage or hospitalization. This is where My Care Labs steps in — offering a testing solution that is both fast and accessible.

## Expanding Our Reach to Nursing and Care Home Facilities

Testing Made Easy. @mycarelabs

### What you need to know about UTI

**10 IN 25 WOMEN & 3 IN 25 MEN**  
will experience at least 1 UTI during their lifetime

UTI are the second most common infection in the body, leading to over 8 million doctor visits each year.

A urinary tract infection (UTI) happens when bacteria enters your urine and moves up to your bladder.

How at risk are you?

My Care Labs has proudly partnered with numerous nursing homes and care facilities across California to provide diagnostic testing services, and we are committed to expanding this network as we introduce our new UTI testing. With facilities already relying on our COVID-19, Flu, and RSV testing services, our goal is to ensure that these essential environments also have easy and immediate access to UTI testing to safeguard the health of their residents. Our state-of-the-art testing platform enables us to deliver accurate results in just 24-48 hours, minimizing the waiting period for treatment and improving patient outcomes.

As we broaden our reach, My Care Labs wants to ensure that no community is left behind. Whether in urban or rural areas, they are dedicated to delivering top-tier diagnostic services that meet the unique needs of every patient. Their mobile testing services, convenient pop-up sites, and at-home test kits are just a few examples of how they strive to make healthcare as accessible as possible.

### Commitment to Care and Convenience

Their medical staff understands the importance of convenience in healthcare, especially for elderly individuals and their caregivers. Their testing services are available 5 days a week, and with our rapid turnaround times, patients and healthcare providers can rest assured that they will receive prompt results. By accepting all major insurances, including MediCare and MediCal, My Care Labs aims to ease the financial burden on families and facilities alike, making high-quality healthcare affordable and accessible for all.

Their UTI testing launches in October and is a continuation of My Care Labs' commitment to proactive, patient-centered care. They are encouraging communities, particularly nursing and care home facilities, to take advantage of this vital service. By working together, they can ensure that the most vulnerable members of our population are protected and cared for.

For more information about our services or to schedule a consultation, please visit [MyCareLabs.com](https://MyCareLabs.com) or contact us at (510) 123-4567.

### About My Care Labs

My Care Labs is a full-service diagnostic testing provider committed to offering rapid, accurate, and accessible healthcare services across California. With an emphasis on patient care and community outreach, My Care Labs offers comprehensive testing solutions, including COVID-19, Flu, RSV, drug screening, wellness bloodwork, and now UTI testing. They pride themselves on working closely with nursing homes, care facilities, and underserved communities to ensure healthcare is within reach for all.
