About Immunolight, LLC

Founded in 2007, Immunolight's mission is to innovate advancements in energy conversion technologies that create value in medicine, commercial industries, and the life sciences. Immunolight has developed a breakthrough platform technology that leverages the latest advances in energy conversion. The technology is centered on energy conversion from one part of the electromagnetic spectrum to another and the paradigm-shifting applications in a variety of medical and non-medical commercial fields. Immunolight's highest priority is to translate innovations in energy conversion, the company's core technology, to fulfill a high, unmet medical need in the development of new possibilities for targeted therapies to treat cancer, particularly through Immunolight Cancer Therapy (formerly X-PACT).
