Impact of Covid-19 on Web Hosting Services Market:

□ The outbreak of covid-19 made most of the business owners sell their products & services online. This, in turn, led to increasing adoption of web hosting services from several corners, thereby, boosting the demand for the global market.

□ Also, several market players doled out free hosting services during the initial phase to help businesses amidst the pandemic and raise their revenue in due course.

Based on deployment model, the public cloud segment accounted for more than two-fifths of the global Internet hosting services market revenue in 2019 and is expected to retain its dominance by 2027. This is attributed to public cloud hosting benefits such as scalability, flexible pricing, extreme reliability, and high performance. Simultaneously, the hybrid cloud segment would showcase the fastest CAGR of 17.2% from 2020 to 2027, due to the advantages that hybrid cloud provides in contrast with the private and public cloud technology.

Based on type, the shared hosting segment contributed to more than one-third of the global web hosting services market share in 2019 and is expected to lead the trail by the end of 2027. This is because most of the SMEs prefer this type of web hosting due to the low traffic that they receive on site. The website builders' segment, on the other hand, would register the fastest CAGR of 18.0% throughout the forecast period.

Based on geography, North America held the major share in 2019, generating around two-fifths of the global web hosting services market, due to the presence of key market players such as AT&T, Amazon Web Services, and GoDaddy Inc. along with the emergence of cloud data centers. At the same time, the market across Asia-Pacific would manifest the fastest CAGR of 19.2% during the forecast period. This is owing to an upsurge in the number of small & medium sized enterprises (SMEs) and rise in adoption of digital platforms in the province.

Some of the key web hosting services industry players profiled in the report include 1&1 Internet Inc., Amazon Web Services Inc., AT&T Inc., Dreamhost Inc., Easyhost, GoDaddy Inc., Google Inc., InMotion Hosting, and Just Host. This study includes web hosting services market trends, analysis, and future estimations to determine the imminent investment pockets.
