•USA Overthrown: The Rescue (Book Two of the Cataclysm series)

Flake's motivation for writing Evacuation stems from a desire to inspire readers to master emergency preparedness. She emphasizes the importance of acquiring wilderness survival skills and establishing essential systems for food, shelter, water, and medical care. According to Flake, such skills will be crucial if the US economy and government ever collapse, and individuals must be ready to thrive in both natural and man-made disasters.

Evacuation conveys a powerful message. During times of cataclysmic weather shifts and government upheavals, humanity must be prepared. Flake hopes her readers will be encouraged to develop self-reliant, cooperative neighborhoods, armed with basic survival skills. She contrasts this with the dangers of an entitled society that relies solely on government assistance, advocating instead for a community where trust and mutual support are paramount.
