The increase in the adoption of big data in healthcare organizations, rise in government initiatives to escalate the adoption of electronic health records (EHRs) among healthcare organizations, and the growing pressure in the healthcare sector to curb unnecessary expenditure fuel the growth of the global healthcare analytics market.

The global healthcare analytics market is segmented on the basis of application, component, deployment model, end user, type and region. Depending on application, it is fragmented into financial analysis, operational & administrative analysis and clinical analysis. By component, the

Healthcare Analytics Market Growth

market is categorized into hardware software and services. By deployment model, it is bifurcated as on-premise and on-demand. As per end user, the market is categorized into, healthcare payers, healthcare providers and others. On the basis of type, it is classified into descriptive analytics, predictive analytics, and prescriptive analytics. Region-wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Based on component, the service segment accounted for nearly half of the global healthcare analytics market in 2020, and is projected to lead the trail by the end of 2030. Rise in demand for cloud-based healthcare analytics services during the global health crisis across the globe is expected to provide potential growth opportunities for the segment. However, the software segment would manifest the fastest CAGR of 16.6% during the forecast period. This is because majority of health care providers choose data warehouse to maintain proper operations of their organizations.

By deployment model, the on-premise segment garnered the largest healthcare analytics share and is expected to maintain its dominance in the upcoming years as on-premise software is considered widely useful in large enterprises as software can be implemented on IT infrastructure of a company itself and it provides more security as compared to on-demand. However, the on-demand segment is expected to witness highest growth, owing to a paradigm shift in deployment methods from on-premise to on-demand models.

Enquiry Before Buying: <https://www.alliedmarketresearch.com/purchase-enquiry/A07488>

Based on region, North America held the major share in 2020, garnering more than half of the global healthcare analytics market, due to increasing adoption of analytics solutions in the healthcare industry and presence of major players in the region. The market across Asia-Pacific would cite the fastest CAGR of 19.4% from 2021 to 2030. Growing government healthcare regulations to reduce the rising healthcare costs and increasing regulatory requirements propel the need for healthcare analytics in the region. This factor drives the market growth in this province.

The key players profiled in the healthcare analytics market analysis are Allscript Healthcare Solution, Cerner Corporation, Health Catalyst, HMS(Vitreoshealth), IBM Corporation, McKesson Corporation, MedeAnalytics, Inc., Oracle Corporation, Optum, Inc., and SAS, Institute. These players have adopted various strategies to increase their market penetration and strengthen their position in the healthcare analytics industry.
