

# Contraceptive Devices global market 2024 to reach \$16.43 billion by 2028 at a rate of 6.5%

*The Business Research Company's  
Contraceptive Devices Global Market  
Report 2024 – Market Size, Trends, And  
Global Forecast 2024-2033*

LONDON, GREATER LONDON, UNITED  
KINGDOM, September 23, 2024

[/Einpresswire.com/](https://www.einpresswire.com/) -- The

contraceptive devices market has  
experienced robust growth in recent

years, expanding from \$12.05 billion in 2023 to \$12.8 billion in 2024 at a compound annual growth rate (CAGR) of 6.3%. The growth in the historic period can be attributed to growing awareness about the importance of family planning and contraceptive methods, government initiatives, increasing global population, greater focus on women's health and empowerment, and improving access to healthcare facilities.

What Is The Estimated Market Size Of The Global  
Contraceptive Devices Market And Its Annual Growth  
Rate?

The contraceptive devices market is projected to continue  
its strong growth, reaching \$16.43 billion in 2028 at a  
compound annual growth rate (CAGR) of 6.5%. The growth  
in the forecast period can be attributed to increasing

awareness of sexual health and STD prevention, economic benefits of controlling family size,  
growing cultural acceptance of contraceptive use, high proportion of young population in  
reproductive age, influence of social media on spreading awareness.

Growth Driver Of The Contraceptive Devices Market

The growing prevalence of sexually transmitted diseases is expected to propel the growth of the  
contraceptive device market going forward. Sexually transmitted diseases (STDs) are infections

Market Size, Trends, And Global Forecast 2024-2033

transmitted primarily through sexual contact, affecting various body parts and potentially leading to a range of symptoms and health complications. Sexually transmitted diseases are rising due to increased sexual activity, a lack of proper protection, insufficient sexual health education, and challenges in access to healthcare and testing. Contraceptive devices, especially condoms, are required for sexually transmitted diseases because they provide a barrier that reduces the risk of transmission by preventing direct contact with infectious fluids and lesions.
