

# PRP Labs and H-Shot Partnered to Establish a New Standard in PRP Hair Restoration

*Partnership combines top-tier PRP equipment, training, and marketing support to set a new global standard in hair restoration procedures.*

CA, UNITED STATES, September 23, 2024 /EINPresswire.com/ -- PRP Labs and H-Shot, LLC announce a strategic partnership to set a new global standard in Platelet-Rich Plasma (PRP) hair restoration treatments. By merging PRP Labs' cutting-edge

medical devices with H-Shot's specialized training, certification, and marketing services, this collaboration promises to elevate the quality and consistency of [PRP hair restoration](#) procedures worldwide.

“

Partnering with H-Shot allows us to help elevate the standard of care for PRP hair restoration procedures.”

*Daniel Zengel founder of PRP Labs*

## Setting a New Standard in PRP Hair Restoration

PRP injections have long been utilized to stimulate hair growth in patients suffering from various forms of alopecia. Despite strong clinical evidence supporting this therapy, the PRP aesthetics industry has been plagued by inconsistent patient experiences and outcomes due to a lack of procedural standardization. Many patients struggle to choose between medical providers, often unaware that some clinicians are using ineffective or non-FDA-compliant

PRP preparation devices, leading to suboptimal results and eroding public trust in PRP treatments for hair loss.

This partnership between PRP Labs and H-Shot addresses those challenges head-on, combining industry-leading FDA-cleared PRP devices with standardized treatment protocols to provide patients with a reliable, high-quality experience across all H-Shot Certified locations.

Introducing the H-Shot Procedure

H-Shot's trademarked PRP hair restoration procedure, known as the "H-Shot," ensures standardized care across all certified clinics. Clinicians undergo rigorous training using FDA-cleared equipment and follow optimized protocols designed to maximize treatment outcomes. As a result, patients can expect the highest quality hair restoration treatments no matter where they receive the H-Shot treatment globally.

As part of this partnership, PRP Labs will supply H-Shot Certified Providers with the cutting-edge equipment, including [EmCyte PRP Kits](#), necessary for the H-Shot procedure. H-Shot, LLC will focus on training and certifying medical providers while investing significantly in global marketing campaigns—including SEO, social media, and PR efforts—to build brand recognition and drive patient demand for the H-Shot procedure.

### Benefits for Patients and Providers

**For Patients:** Access to reliable, high-quality PRP hair restoration procedures using state-of-the-art equipment and standardized techniques, leading to better therapeutic outcomes and a consistent care experience.

**For Providers:** Access to the latest PRP technology, comprehensive training, certification, and marketing support to increase practice revenue without compromising quality. Clinicians can differentiate themselves from competitors with the trusted H-Shot brand, attracting more patients and increasing revenue.

### Statements from Leadership

"Our goal at PRP Labs has always been to empower clinicians with the best tools available," said Daniel Zengel, Founder of PRP Labs. "While we have traditionally provided [PRP equipment for orthopedic pain management](#) practices, partnering with H-Shot allows us to help elevate the standard of care for PRP hair restoration procedures. The H-Shot procedure demonstrates a commitment to excellence in patient care that aligns with our company values. Through this partnership, we aim to redefine PRP hair restoration by setting a new industry benchmark for quality and consistency."

### About PRP Labs

PRP Labs is a leading provider of premium PRP equipment, dedicated to advancing regenerative medicine by supplying healthcare providers with the medical devices needed for optimal patient outcomes.

### About H-Shot, LLC

H-Shot, LLC provides training, certification, and marketing services to medical professionals

globally. The company focuses on the trademarked H-Shot procedure, a non-invasive treatment designed to slow hair loss and promote hair growth in patients with various forms of alopecia.
