Key manufacturers have carried numerous developments in the Europe van market. For instance, in August 2022, Mercedes-Benz expanded its Marco Polo family with new micro-camper panel van module for T-Class. According to the company, T-Class serves families and leisure enthusiasts who need plenty of space but in a more compact vehicle. The T-Class is essentially a posher version of the Citan. In addition, in May 2022, Volkswagen commercial vehicles launched a new Engineered To Go conversion for Crafter Luton van, with Palfinger tail lift available as a model. The Palfinger V500LQ tail lift provides 500kg lifting capacity on an aluminum load platform. The Crafter Luton tail lift conversion is built on the brand's innovative chassis cab.

The report offers a detailed segmentation of the Europe van market based on type and region. The report provides an analysis of each segment and sub-segment with the help of tables and figures. This analysis helps market players, investors, and new entrants in determining the sub-segments to be tapped on to achieve growth in the coming years.

□□□□ □□ □□□□, the medium van segment held the largest share in 2021, [accounting for nearly two-fifths of the Europe van market](#). However, the small van segment would dominate in terms of revenue through 2031 and the large van segment is estimated to witness the fastest CAGR of 6.4% during the forecast period.

□□□□□ □□ □□□□□□□, the market in rest of Europe was the largest in 2021, accounting for more than one-third of the Europe van market, and is likely to maintain its leadership status during the forecast period. However, the market in the UK is expected to manifest the highest CAGR of 7.8% from 2022 to 2031. The other countries analyzed in the study include Germany, France, Russia, and Italy.

Factors such as expansion of the logistics industry, along with development of the automotive industry with a growing inclination toward leisure & recreational activities are some of the prominent factors that propel demand for vans in Europe. However, availability of alternate vehicles and implementation of stringent emission norms are expected to hinder growth of the Europe van market. Moreover, increase in government initiatives for promotion of e-mobility and rise in demand for electric vans from the logistics sector in Europe is expected to provide growth opportunities for the market during the forecast period
