[Growth Driver Of The Organic Pigments Market](#)

An increasing textile industry is expected to propel the growth of the organic pigments market going forward. The textile sector refers to the industries that are primarily concerned with the design or manufacture of clothing and the distribution and use of textiles. A textile is a stretchy material made of a web of synthetic or natural fibers. Organic pigments are used in textiles to give the product color, opaqueness, and other desirable features. This will drive market

expansion for organic pigments, as these are widely employed in textile industry for dyeing and printing.
