[Perishable Goods Sea Transportation Market Definition](#)

Perishable goods sea transportation refers to the transportation of temperature-sensitive goods by sea in refrigerated ships outfitted with proper air circulation systems and temperature-controlled intermodal cargo containers.

The two major types of sea transportation for perishable goods are domestic transportation and outbound transportation. Domestic transportation refers to the transportation of perishable goods within the national borders of a country. By order type, perishable goods transportation is divided into export and import orders. These services are used to transport various perishable goods, such as meat, chicken, fish, shellfish, vegetables and fruits, bread, candy, and snacks, dairy products, frozen desserts, and other goods.
