The regions covered in the report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, Africa.

Military Personal Protective Equipment Market Definition

Military personal protective equipment or PPE refers to clothing worn to reduce exposure to risks that might result in significant workplace diseases and injuries. It is used in military applications to shield military personnel from illnesses brought on by their harsh living conditions or injuries sustained during combat.

The main types of military personal protective equipment are body armor, tactical vest, eye protection, combat helmet, life safety jacket, pelvic protection, respiratory protection, and others. Body armor is protective clothing that someone wears to absorb or deflect physical attacks that might otherwise harm them. These are used for detection solutions, fall protection, head and face protection, hearing protection, protective apparel, protective communications, protective eyewear, respiratory protection, and welding safety. The various applications include army, air force, navy, and others.
