

Tarzana Cosmetic Dentist Discusses Smile Makeover Options

Dr. Argina Kudaverdian of 32ology Dental Studio details common dental services available for smile makeover patients.

TARZANA, CA, UNITED STATES, September 25, 2024 /EINPresswire.com/ -- For many individuals, a [smile makeover](#) offers comprehensive enhancement when more than one dental concern is present. This treatment often combines cosmetic and restorative procedures to help improve both smile aesthetics and functionality. [Tarzana cosmetic dentist](#) Argina Kudaverdian, DDS explains that a smile makeover can be tailored to address a patient's specific needs, including tooth discoloration, misalignment, chips, and more.

Dr. Kudaverdian notes that common smile makeover treatments include:

- [Porcelain Veneers](#) – Custom-crafted for a seamless fit, porcelain veneers are one of the most beneficial treatments in cosmetic dentistry, providing a durable and aesthetically pleasing solution for chipped, stained, or misaligned teeth. Additionally, minimal prep veneers are a conservative option that often requires little to no removal of tooth enamel.
- Cosmetic Bonding – A quick and effective treatment, cosmetic bonding uses a tooth-colored resin to repair imperfections and improve tooth appearance, offering an alternative to more invasive procedures.
- Invisalign® – The popular Invisalign® treatment is a modern and discreet orthodontic approach to straightening teeth through a series of clear, custom aligners.
- Teeth Whitening – Utilizing state-of-the-art technology, in-office teeth whitening is designed to safely and effectively brighten smiles by several shades.
- Gum Lift – A gum lift involves reshaping the gum line to expose more of the teeth, enhancing

the overall look and symmetry of a patient's smile.

- Dental Implants – For patients seeking a more permanent solution to missing teeth, dental implants offer a secure and natural-looking option, improving oral health and functionality.
- Dental Crowns – Tailored to restore both the appearance and strength of damaged teeth, dental crowns are a key component of restorative and cosmetic dental care.

Ultimately, Dr. Kudaverdian says that the procedures chosen for a smile makeover are decided upon based on a patient's specific dental needs and cosmetic goals. The best way to determine which treatments are most appropriate is through a consultation with a qualified and experienced dental professional.

About Argina Kudaverdian, DDS
