

Inulin Market Is Poised to Reach USD 2.98 Billion, Reflecting a CAGR of 6.9% From 2024 to 2032

Inulin is being increasingly used in pharmaceuticals and dietary supplements owing to its various potential health benefits.

NEW YORK CITY, NY, UNITED STATES, September 25, 2024 /EINPresswire.com/ -- Information about trends, drivers, restraints and opportunities and their impact on inulin market growth has been provided in the report.

Inulin derived from the chicory root serves as a prebiotic fiber and enhances the nutritional profile of functional foods, making it a highly preferred ingredient in the food and beverage industry."

Polaris Market Research

The inulin market is projected to reach USD 2.98 billion by 2032, reflecting a CAGR of 6.9% from 2024 to 2032. The market was valued at USD 1.64 billion in 2023. The report provides a comprehensive analysis of the market, including a detailed SWOT analysis, a PESTLE analysis, and a Porter's Five Forces analysis. The report also includes a list of key players in the market and their market share. The report is available for purchase at <https://www.polarismarketresearch.com/industry-analysis/global-inulin-market/request-for-sample>.

What is inulin?

Inulin is a type of dietary fiber that's found in a wide variety of vegetables, fruits, and herbs. As a prebiotic, inulin doesn't get digested or absorbed in the stomach. Instead, it stays in the bowel and helps specific bacteria to grow. The major sources of inulin include leeks, onions, asparagus, bananas, and wheat. The inulin that's used in supplements such as protein bars, cereal bars, and drinks is typically obtained by soaking chicory roots in hot water.

People take inulin for a variety of reasons. Consuming inulin can help maintain the balance between good and bad bacteria and keep the gut healthy. Also, it can relieve constipation and promote weight loss. Other potential health benefits of inulin include controlled diabetes, improved mineral absorption and bone health, and reduced symptoms of inflammatory bowel

disease. The rising prevalence of lifestyle-related health issues has led to significant demand for functional ingredients such as inulin, impacting the inulin market growth favorably.

The graphic features a purple background with a photograph of a loaf of bread, several red onions, and a head of garlic. In the top left corner, the logo for POLARIS MARKET RESEARCH is displayed next to the title 'Inulin Market'. At the bottom left, a dark purple box contains a bar chart icon, the text 'US\$ 2.98 bn', and 'Revenue Forecast in 2032'. Below the graphic, the text 'Inulin Market' is written in a simple font.

Market Growth Drivers?

- **Increased Geriatric Population:** The expanding geriatric population has resulted in increased demand for dietary solutions that help address health concerns associated with aging. Inulin, with its recognized benefits for digestive health and overall well-being, has gained widespread prominence as a valuable ingredient in products for older adults.
- **Rising Disposable Income:** The increase in disposable income has enabled consumers to make more informed and health-conscious choices for their dietary preferences. Individuals are now more inclined to invest in products that offer functional benefits and help maintain overall health.
- **Growing Applications:** Inulin is known for its ability to enhance calcium absorption, support digestive health, and contribute to overall weight management. The increasing applications of inulin in sectors such as dietary supplements and pharmaceuticals contribute to the inulin market growth.

Which Region Leads Market Demand?

- **Europe:** Europe led the market for inulin in 2023. This is primarily due to the increased emphasis on healthy and functional foods, driven by a rising health-conscious consumer base. Besides, significant investments in research & development are driving product innovation and impacting the regional market growth favorably.
- **Asia Pacific:** Asia Pacific is anticipated to witness significant growth in the inulin market from 2024 to 2032. The rising focus on health and wellness has resulted in a notable shift in dietary preferences and lifestyles in the region. Also, increasing awareness about dietary fibers and prebiotics among the expanding middle class has led to increased interest in functional foods in the region.

Market Outlook by Source?
