Growth Driver Of The Imaging Chemicals Market

The increasing prevalence of cancer & brain disorders is driving the growth of the imaging chemicals market. Cancer is any of a large number of diseases characterized by the uncontrollable division of abnormal cells, whereas brain disorders are diseases of the central and peripheral nervous systems. The rising prevalence of cancer and brain disorders is fueling

the growth of the imaging chemicals, which offers benefits such as real-time monitoring, determining the stage and precise location of cancer to aid in the direction of surgery and other cancer treatments, and visualizing cellular activity.
