Definition: Footwear is worn to protect the foot against rough surfaces, extreme temperatures, and gravel roads. Leather, plastic, rubber, and cloth are some of the materials used in footwear. Leather is one of the most common materials used in the manufacture of footwear. Second-hand footwear is selling things that have already been owned or used. Second-hand goods are

sold at usually 30%-80% less as compared to the retail price of new luxury goods. Furthermore, an increasing number of resale shoppers has been driving the market. Several E-commerce websites have led to the growth of these products. Rising consumer living standards, aided by rising disposable income levels, have strengthened the market for secondhand products in both established and emerging nations, with millennials and the urbanized population preferring high-end fashion accessories at lower rates.

Market Trends:

With growing awareness about the environmental impact of fast fashion and the desire to reduce waste, many consumers are turning to second-hand options for their clothing and footwear.

Market Drivers:

Changing lifestyles of People

Rising number of sports inspired children

Market Opportunities:

Growing Acceptance of Second Hand Products Among Youth

Efficient E- Commerce Sales Channels

Fastest-Growing Region:

Asia Pacific

Dominating Region:

North America
