

# 15-Year-Old Nashville High School Student Launches Spikey, a Drink Spike Detection Product

BRENTWOOD, TN, UNITED STATES,  
September 26, 2024 /

EINPresswire.com/ -- Abigail Goddard,  
a 15-year-old student at Ravenwood  
High School, has created Spikey  
([www.spikeyfirst.com](http://www.spikeyfirst.com)), a

groundbreaking solution designed to  
detect drink spiking, a growing  
problem leading to crimes such as  
sexual assault and theft. Driven by her  
passion for entrepreneurship and  
social causes, Abigail Goddard has  
partnered with a pharmaceutical  
company in the U.K. to develop this innovative product, which discreetly and effectively detects  
commonly used drink spike drugs.

Spikey drink spike detection product

The product can detect amine-based drugs including GHB (gamma hydroxybutyrate), Ketamine, Scopolamine, Cocaine, and others. Spikey's mission is to help prevent the increasing incidents of drink spiking, particularly on university campuses where such crimes are prevalent.

“

It's important for people to feel safe in social settings... I wanted to create a product that not only addresses this issue but also empowers individuals to protect themselves discreetly.”

*Abigail Goddard*

Over the last two months, Abigail has teamed up with a group of equally passionate high school students from coast to coast to raise awareness about the dangers of drink spiking. Together, they are spreading the message on university campuses, aiming to reduce the number of victims affected by these alarming crimes.

“It's important for people to feel safe in social settings,” said Abigail Goddard, “I wanted to create a product that not only addresses this issue but also empowers individuals to protect themselves discreetly.”
