Growth Driver of The Trocars Market  
The increase in ageing population is expected to increase

the prevalence of age-related ailments thus contributing to the growth of the trocars market over coming years. The elderly population is increasing rapidly across the world, and it is expected to continue over the forecast period. Several routine surgical procedures are being

gradually replaced by laparoscopic techniques in the older population. During laparoscopic surgery, trocars are inserted through the abdomen to cause minimal invasion to the patient.
