Growth Driver of The Foreign Body Removal Market

Increasing demand for minimally invasive surgery is expected to propel the growth of the foreign body removal market going forward. Minimally invasive surgery is the type of procedure that involves smaller incisions and shorter recovery time and makes use of few stitches. Foreign body removal is a minimally invasive surgical procedure that is used to get rid of objects that have

been swallowed and lodged in the digestive system or any region of the body. The invasive surgery is performed for foreign body removal which leads to an increase in the demand for the foreign body removal.
