

Cutty Investigations: A Trusted Name in the Private Investigation Industry

Phoenix, AZ – Cutty Investigations, a private investigator firm in Phoenix, Arizona with over two decades of experience, is excited to share an exclusive interview with its founder, Rick Hanson. In this candid discussion, Hanson offers a deep dive into the origins, values, and future vision of the company, which has established itself as a trusted leader in the private investigation industry.

A Vision Rooted in Integrity and Professionalism

Rick Hanson, with over 20 years of experience in international protection, founded Cutty Investigations in 1997. His vision was clear from the outset: to create a firm that could provide unparalleled investigative services, grounded in professionalism and integrity. “Our journey began when I was immersed in international protection, safeguarding high-profile individuals and sensitive operations globally,” Hanson explains. “This experience highlighted the need for a firm that could seamlessly integrate top-tier protective services with rigorous investigative capabilities.”

Cutty Investigations has since stayed true to its mission, offering a wide spectrum of professional private investigations services. The firm has built a reputation for delivering information, trust, and peace of mind to its clients, ensuring that their needs are met with precision and discretion.

Commitment to Confidentiality and Ethical Practices

At the core of Cutty Investigations is an unwavering commitment to confidentiality and ethical practices. The firm employs only licensed and trained investigators who adhere to strict confidentiality agreements. “Confidentiality and discretion are the cornerstones of our investigative practice,” says Hanson. “Our data management practices, including the use of encrypted systems, ensure that only authorized personnel can access sensitive data. This approach maintains the highest level of privacy and discretion for our clients.”

Cutty Investigations also adheres to stringent ethical guidelines, ensuring that all information gathered during an investigation is used appropriately and lawfully. Licensed by the Arizona Department of Public Safety (AZ DPS), the firm’s investigators operate with the highest level of ethical responsibility, guided by a philosophy rooted in honor and integrity.

Facing Challenges with Innovation and Expertise

Private investigations come with unique challenges, from gathering accurate information within legal boundaries to dealing with uncooperative subjects. Technological advancements, while beneficial, can also complicate investigations. However, Cutty Investigations is well-equipped to face these challenges head-on. “We gather as much information as possible from our clients before initiating an investigation,” explains Hanson. “This preparation allows us to develop a comprehensive strategy tailored to the specific circumstances of each case.”

The firm stays updated with legal requirements and uses advanced technology and specialized

training to handle even the most complex situations effectively. This commitment to excellence ensures that clients receive the highest level of service, regardless of the challenges presented.

Preparing for the Future of the Industry

Looking ahead, Hanson sees significant evolution in the private investigation industry, driven by advancements in technology and the increasing complexity of challenges. "The integration of artificial intelligence and advanced data analytics will likely play a significant role in enhancing investigative capabilities," he predicts. These technologies will help process large volumes of data more efficiently, identifying patterns and uncovering insights that may not be immediately apparent through traditional methods.

To prepare for these changes, Cutty Investigations is proactively investing in the latest technologies and ensuring its team is trained to utilize them effectively. The firm also stays abreast of industry developments through continuous education and active participation in professional associations.
