

NMSU Global Campus to offer on-line Project Management Microlearning course, Starting October 1st

This online course meets the 35-hour PMP certification training requirement and the 23-hour education requirement for the CAPM certification

LAS CRUCES, NM, UNITED STATES,
September 26, 2024 /
EINPresswire.com/ -- New Mexico State University (NMSU) Global is now accepting enrollments for the [Project Management: Fall 2024](#) microlearning course. Designed to meet the growing demand for certified project managers, this online course helps professionals achieve the prestigious Project Management Professional (PMP)[®] and Certified Associate in Project Management (CAPM)[®] certifications.

These certifications are essential for those looking to advance their careers, increase earning potential, and gain recognition as experts in project management.

Starting on October 1, the Project Management microlearning course meets the 35-hour PMP certification training requirement and also satisfies the 23-hour education requirement for the CAPM certification. This course is offered at \$1,500 and provides the flexibility of online learning, allowing busy professionals to upgrade their project management skills without interrupting their careers. Enroll now to take advantage of this opportunity to enhance your career with a globally recognized certification.

The course is taught by Dr. Thomas G. Pittz, an Associate Professor of Entrepreneurship and Management at the University of Tampa. Dr. Pittz has years of experience in project management, having worked with Wells Fargo and other organizations before transitioning into academia. He is a widely published author on topics like risk-sharing, innovation, and strategic management. A project management course equips students with versatile organizational skills

New Mexico State University Global Campus is offering a project management course that will equip students with versatile organizational skills in problem-solving, analysis, strategic thinking and teamwork, enhancing employability and readiness for leader

in problem-solving, analysis, strategic thinking, and teamwork, enhancing their employability and readiness for leadership roles in various industries. Andrew Sedillo, Director of [Microcredentials](#) Instructional Design at NMSU Global, explains the course's value:
