The global Loan Servicing Software Market Size is estimated to register 16.5% growth over the forecast period from 2023 to 2030.

An Overview of the Loan Servicing Software Market
The global loan servicing software market is expected to grow at a sluggish pace during the forecast period. Rising demand for automated management in real estate & rental operations and growing adoption of cloud-based loan servicing solutions are expected to be some of the major factors aiding into the growth for the market. However, the market is expected to witness a decline in the growth during FY 2020 but it is again expected to rise with a healthy pace after the COVID-19 pandemic is over.
