

Vipera Secures Strategic Acquisition of 750 Antminer S21E XP Hydro 860TH/s Units from Bitmain

Vipera expands mining capacity with the acquisition of 750 Antminer S21E XP Hydro 860TH/s units from Bitmain, boosting efficiency and performance for 2024.

CANADA, September 27, 2024
/EINPresswire.com/ -- Vipera, a leader in cryptocurrency mining solutions, is excited to announce the acquisition of 750 [Antminer S21E XP Hydro](#) 860TH/s units from Bitmain, the global titan of mining hardware technology. This

acquisition is part of Vipera's strategic expansion to increase its mining capacity and enhance operational efficiency. Delivery is expected to be completed in November 2024, making these units available just in time to optimize performance for the upcoming year.

State-of-the-Art Mining Technology: Antminer [S21E XP Hydro](#)

The Antminer S21E XP Hydro 860TH/s is one of the most advanced mining machines currently available, specifically designed to handle the rigorous demands of modern cryptocurrency mining. Its high hash rate of 860 terahashes per second (TH/s) ensures powerful processing capability, making it ideal for large-scale operations. The hydro-cooling technology significantly improves energy efficiency, reduces heat, and extends the hardware lifespan by maintaining optimal operating temperatures.

Key specifications of the Antminer S21E XP Hydro:

Hash Rate: 860 TH/s (+/- 5%)

Power Consumption: 5,000 watts

Energy Efficiency: 29.07 J/TH

Cooling System: Hydro-cooling for optimized thermal management and reduced noise

Operating Temperature: 0°C to 40°C

Network Connection: Ethernet

With these specifications, the S21E XP Hydro provides industry-leading performance while maintaining an eco-friendly profile, making it one of the most efficient mining units on the market today.

Boosting Capacity and Efficiency

Vipera's decision to invest in these high-performance units underscores its commitment to staying at the forefront of cryptocurrency mining. By integrating 750 Antminer S21E XP Hydro units into its infrastructure, Vipera will significantly increase its hash power and optimize energy consumption across its mining operations.

“This acquisition represents a mighty leap forward for Vipera as we continue to scale our operations and improve efficiency,” said James Campagna, CEO of Vipera. “The Antminer S21E XP Hydro units from Bitmain are the perfect fit for our goals of maximizing output while reducing our carbon footprint. We are excited to have these cutting-edge units in place by November 2024.”

Open for Pre-Orders and Deliveries

Vipera is also pleased to announce that it is open to accepting pre-orders for customers interested in acquiring the Antminer S21E XP Hydro units. With a focus on delivering excellence, Vipera is prepared to facilitate orders and ensure timely deliveries. The initial shipment of 750 units is scheduled to arrive in November 2024, allowing our customers to receive their units by the first week of December 2024. This ensures timely delivery, enabling clients to promptly deploy the equipment for optimal performance.

“Timing is critical in the cryptocurrency mining industry,” added James Campagna, CEO at Vipera. “By securing early access to these [high-performance machines](#), our customers can get ahead of the competition with the latest in mining technology.”

Why Choose Vipera for Your Mining Solutions?

Vipera is dedicated to providing state-of-the-art mining solutions, offering clients not just hardware, but comprehensive support to maximize mining efficiency. The combination of top-tier Bitmain products and Vipera’s expertise in cryptocurrency mining ensures that customers receive the best technology, guidance, and service in the market.

Reasons to Choose Vipera:

High-Performance Hardware: Cutting-edge equipment to maximize returns.

Sustainability: Energy-efficient solutions that align with environmental standards.

Support and Expertise: Vipera offers full-scale support from setup to ongoing maintenance,

ensuring seamless integration of all units into your operations.

Rapid Delivery: With deliveries beginning in December 2024, Vipera ensures that customers can get started as quickly as possible.

About Vipera

Vipera is a leader in cryptocurrency mining solutions, offering a range of products and services designed to optimize mining performance and profitability. With a focus on energy efficiency, scalability, and sustainability, Vipera provides end-to-end solutions for large-scale miners, ensuring that clients stay ahead in an increasingly competitive industry.

About Bitmain

Bitmain is a global leader in the production of cryptocurrency mining hardware, renowned for its Antminer product line, which continues to set new standards for mining efficiency and innovation. Bitmain's products are trusted by mining operators worldwide for their high performance, reliability, and energy efficiency.

For more information about pre-ordering the Antminer S21E XP Hydro units or to learn more about Vipera's services, please visit www.viperatech.com or contact us directly.
