

# Sarcomatrix Therapeutics Awarded Prestigious "Startup Spotlight" at BIO-Europe 2024

RENO, NV, UNITED STATES, September 27, 2024 /EINPresswire.com/ --

Sarcomatrix Therapeutics, an emerging leader in the development of innovative therapies for [muscle](#)

[diseases](#), is proud to announce that it has been awarded the highly coveted "Startup Spotlight" recognition at BIO-Europe 2024, which will take place from November 4-6, 2024, in Stockholm, Sweden.

The Sarcomatrix logo, featuring the word "SARCOMATRIX" in a bold, orange, sans-serif font. Below it is the tagline "Saving Lives by Restoring Muscles" in a smaller, black, sans-serif font.

**SARCOMATRIX**  
Saving Lives by Restoring Muscles

“

This acknowledgment underscores the tremendous progress Sarcomatrix has made in advancing treatments for debilitating muscle diseases like sarcopenia and muscular dystrophy”

*David Craig, CEO*

The recognition celebrates Sarcomatrix’s groundbreaking work in the biotechnology sector and its rapid rise as a key player in the muscle disease treatment space.

BIO-Europe attracts thousands of life sciences executives from across the globe, representing the full range of biotech and pharma companies, as well as investors and experts in drug development. This award places Sarcomatrix in the spotlight as a company with high potential for innovation and growth in an increasingly competitive market.

The "Startup Spotlight" is a prestigious honor granted to a select number of high-potential startups during BIO-Europe. Companies chosen for the spotlight are recognized for their innovative contributions to the life sciences industry and are given a prominent platform to present their technologies, business strategies, and vision to a global audience of investors, strategic partners, and biotech leaders. Winning companies receive heightened visibility and exclusive networking opportunities that can lead to funding, strategic partnerships, and accelerated growth.

David Craig, CEO of Sarcomatrix Therapeutics, expressed his excitement about the recognition:

“We are honored to receive the ‘Startup Spotlight’ at BIO-Europe 2024. This acknowledgment

underscores the tremendous progress Sarcomatrix has made in advancing our lead once daily oral drug candidate, S-969, for the treatment of debilitating muscle diseases like [sarcopenia](#) and muscular dystrophy. It is also a testament to the hard work of our entire team and our commitment to addressing unmet medical needs.”

In addition to advancing S-969, Sarcomatrix is also developing a protein replacement therapy using laminin-111, a potential treatment for LAMA2-related muscular dystrophy (LAMA2-RD), Duchenne muscular dystrophy, and other muscular dystrophies. Laminin-111 has shown promise in promoting muscle repair and regeneration, offering a new therapeutic avenue for patients with these severe, life-limiting conditions. The company is committed to exploring laminin-111’s full potential in addressing the unmet medical needs in rare muscle diseases.

Sarcomatrix also boasts a robust portfolio of oral small molecule drugs that engage a novel target, demonstrating high selectivity. These promising second-generation leads are advancing the frontier of small molecule therapeutics, showing potential for optimized safety and efficacy profiles. This portfolio further strengthens Sarcomatrix’s commitment to developing breakthrough treatments that address muscle diseases and other related conditions.

Sarcomatrix’s lead molecule, S-969, targets the Hippo-YAP signaling axis, aiming to promote muscle regeneration and prevent muscle degradation. This innovative approach is positioned to bring new hope to patients suffering from muscle-wasting diseases, a space with limited treatment options.

The "Startup Spotlight" award will further bolster Sarcomatrix’s presence at BIO-Europe, providing an unparalleled opportunity to connect with potential partners, investors, and global biotech leaders.

#### About Sarcomatrix Therapeutics:

Sarcomatrix Therapeutics is at the forefront of developing novel therapies for muscle diseases. The company’s mission is to revolutionize treatment for conditions such as sarcopenia, muscular dystrophy, and other rare muscle disorders by focusing on cutting-edge science and clinical innovation. Sarcomatrix is committed to advancing its pipeline and delivering breakthrough therapies to patients worldwide.

#### About BIO-Europe:

BIO-Europe is the largest life sciences partnering conference in Europe, fostering collaboration between global biotechnology, pharmaceutical companies, and investors. The 2024 edition will be held in Munich, Germany from November 4-6, 2024, attracting thousands of executives from biotech, pharma, and finance industries, facilitating strategic partnerships and investment opportunities.
