Growth Driver Of The Urothelial Cancer Drugs Market

The increasing demand for chemotherapy is expected to propel the growth of the urothelial
cancer drugs market going forward. Chemotherapy is a systemic treatment, meaning it circulates
throughout the body via the bloodstream which makes it effective against cancer cells that may
have spread to distant sites. Chemotherapy is used in the management of urothelial cancer by
inhibiting the growth of cancer cells, to treat metastatic disease, targeting rapidly dividing cells,

and can be used for palliative care which aims to relieve symptoms, improve the patient's quality of life, and prolong survival.
