The Business Research Company

The increasing prevalence of zoonotic diseases is expected to propel the growth of the veterinary active pharmaceutical ingredients manufacturing market going forward. A zoonotic disease, also known as zoonosis, is an infectious disease that can be transmitted naturally from animals to humans or from humans to animals. Veterinary APIs are used in the development of vaccines that can prevent the spread of zoonotic diseases from animals to humans. The use of veterinary APIs can also help prevent antibiotic resistance, which is a major concern in the treatment of zoonotic diseases.
