

# Fulfillment 3Sixty Announces Expanded Civil Aviation Offerings with a Focus on Diverse Specifications and Standards

*ASAP Semiconductor announces its plan to expand product offerings and fulfillment services on Fulfillment 3Sixty.*

ANAHEIM, CA, UNITED STATES, September 30, 2024 /EINPresswire.com/ -- ASAP Semiconductor, a

“

We are excited to support our customers and the wider industry with increased product solutions, coupled with efficient service provided by our team at ASAP Semiconductor.”

*Joe Faruqui*

California-based distributor of aerospace, defense, and industrial components, announced today its plans for the continued expansion of product offerings and fulfillment services presented through its website, Fulfillment 3Sixty. While currently serving as a platform for the company to curate and market its supply of civil aviation parts, this development will be particularly focused on tackling a rising need of manufacturers and maintenance, repair, and overhaul (MRO) providers for solutions that meet recognized industry standards and specifications.

The platform's planned growth is part of a larger trend across the civil aviation industry, where a pressing demand for aftermarket parts is being driven by increasing rates of aircraft use across the globe and a need to maintain or retrofit aging fleets. As more airlines and operators seek to extend the life of their existing aircraft, the availability of dependable overhaul replacement parts is becoming increasingly critical.

Through analysis of industry trends and customer purchasing habits, ASAP Semiconductor will progressively identify key areas of demand, utilizing such data to maintain a diverse selection of aviation bearings, aircraft engine baffle equipment, aircraft propeller parts, electrical connector part types, and an extensive aviation fasteners part catalog on Fulfillment 3Sixty. In recognition of the role that industry standards play in meeting project and industry requirements, Fulfillment 3Sixty will also regularly have additions to its catalogs that organize Boeing Aircraft Company (BAC) standard parts, [military standard \(MS\) aerospace parts](#), aviation standard (AS) parts, and National Aerospace Standard (NAS) parts.

In addition to increasing offerings, ASAP Semiconductor states that Fulfillment 3Sixty will also

have its purchasing resources and search engine updated to reflect new listings. This will allow for more simple navigation of online catalogs with the ability to identify part numbers by their manufacturer, NSN, NIIN, [CAGE Code](#), or FSC. Additionally, in adherence with ASAP Semiconductor's quality-assurance practices, all newly stocked items will be cross-referenced with accompanying documentation and qualifying certifications to ensure accuracy of listings. By continuously updating its product offerings and technical data on the website, ASAP Semiconductor aims to provide access to the most up-to-date information on parts.

As the civil aviation industry continues to evolve and demand shifts, ASAP Semiconductor will remain committed

to expanding its [catalog of aviation parts](#) across purchasing platforms, offering customers the tools they need to stay competitive in an ever-changing market. Additionally, the distributor plans to continue developing its team of representatives while strengthening relationships across industries, allowing it to expand Fulfillment 3Sixty's inventory.

With a diverse selection of parts that meet rigorous industry standards offered through Fulfillment 3Sixty, the platform strives to further position itself as a resource for operators, manufacturers, and MRO professionals alike. If you would like more information about this purchasing platform and its range of offerings, please visit the website at <https://www.fulfillment3sixty.com/> or contact ASAP Semiconductor directly.

### About Fulfillment 3Sixty

Fulfillment 3Sixty is an ASAP Semiconductor platform designed to provide access to a wide range of civil aviation parts, board-level components, and electrical connectors. Customers can shop on the website using curated product catalogs, search engines, and an online Request for Quote (RFQ) service with rapid turnaround times. Industry experts are also available by phone or email to provide consultation and service, ensuring that airlines, MRO providers, manufacturers, and others are able to obtain the solutions they need for carrying out operations.
