Surge in the prevalence of diabetes, rise in sedentary lifestyle, and increase in incidences of other chronic diseases such as hypertension drive the growth of the global diabetes therapeutics market. At the same time, surge in awareness among population about self-management of diabetes has supplemented the market growth yet more. Furthermore, development of affordable and effective diabetes therapeutics such as oral hypoglycemic agents and several government initiatives to provide diabetes care facilities are expected to create lucrative opportunities in the industry.

Diabetes Therapeutics market segmentation can be done based on several factors, including:

Based on product, the injectables segment held nearly three-fourths of the global diabetes therapeutics market revenue in 2020, and is expected to lead the trail by 2030. The same segment would also manifest the fastest CAGR of 10.6% from 2021 to 2030, owing to rise in the prevalence of diabetes among individuals across the world.

Based on region, Asia-Pacific, followed by North America, held the major share in 2020, generating more than one-third of the global diabetes therapeutics market. Rise in the prevalence of diabetes, sedentary lifestyle, and well-established healthcare infrastructure in the province propel the market growth. The Asia-Pacific region, however, would grow at the fastest CAGR of 11.2% by 2030, due to increase in number of geriatric population and surge in the incidence of diabetes among them.
