

Soundcore Launches Liberty 4 Pro Featuring Elegant Case With Display And Touch Bar For ANC Adjustment

BELLEVUE,, WA, UNITED STATES, October 3, 2024 /EINPresswire.com/ -- Soundcore, Anker Innovations' premium audio brand, today launched the Liberty 4 Pro, the brand's most elegantly designed earbuds to date. This device features Soundcore's most advanced Adaptive ANC system that utilizes six microphones, and a barometric pressure sensor to help users shut out the outside world while listening to music. Additionally, in a first for Soundcore, the charging case features a built-in screen that highlights the user's current setting and works in conjunction with a touch bar located on the front of the case to adjust the strength of the noise cancelling or transparency audio performance.

Soundcore's New Liberty 4 Pro in 3 Colors

Building on the previous success of the Liberty Pro line, the Liberty 4 Pro uses six microphones, as well as one barometric pressure sensor, to capture and isolate noise surrounding the user's head. Soundcore's ANC 3.0 algorithm adapts to the user's ever-changing environment three times per second, ensuring the strongest and most seamless noise reduction.

In addition, the Liberty 4 Pro built a screen on the inside of the case which can be seen through the top cover when closed in two of the three color models (Glossy Light Blue and Glossy Black). The white model has an opaque cover, requiring users to open the cover to access the screen. In another Soundcore first, the traditional pairing button has been replaced by a touch bar for adjusting the strength of noise cancellation or transparency by simply swiping left or right.

The Liberty 4 Pro offers an impressive high-fidelity experience, by utilizing Soundcore's ACAA

acoustic architecture, combining a 10.5mm woofer with a 4.6mm titanium tweeter in a coaxial design. For the best and most accurate playback, Android users can enable LDAC for the highest-quality audio transmission with high resolution playback.

Ensuring the Liberty 4 Pro are ready to go at a moment's notice, charging the earbuds in the case for just five minutes provides up to four hours of playtime and charges twice as fast as previous models. Users can take advantage of the 10 hours of playtime with ANC turned off and 7.5 hours with ANC enabled as well as respectively, a total of 40 hours and 30 hours with the case.

Finally, for individual customization capabilities, the Liberty 4 Pro will be compatible with the Soundcore app, as well as the newest version of HearID to help consumers tailor the sound to their hearing profile. An 8-band customizable EQ is also available, as well as a number of preset sound profiles.

Pricing and Availability

The new Liberty 4 Pro comes in Glossy Light Blue, Glossy Black and White and will be available starting today on Amazon.com, [Soundcore.com](https://www.soundcore.com), and from select retailers for \$129.99 in the US; £129.99 in the UK and €129.99 in DE markets.
