“

Carry Handle Adhesive Tapes are specialized tapes designed to create easy-to-use and durable carrying handles on packages, cartons, or multipacks.”

David Correa

Driving Forces of Market Growth

The market's expansion is propelled by several key factors, including increased investments in research and development, entry of new players, product innovation, and technological advancements. Additionally, growing competition among businesses to expand their regional and customer base stimulates market growth. As disposable incomes rise, customers' spending capacity increases, further boosting demand for carry handle

adhesive tapes and presenting lucrative opportunities in the industry.

Understanding Carry Handle Adhesive Tapes

Carry handle adhesive tapes are flexible strips of self-adhesive film used primarily in packaging

applications. They offer convenience in gripping, lifting, and transporting products, facilitating the packing and bundling of various items. These tapes boast advanced properties such as temperature and moisture resistance, making them ideal for packing bulky products. Additionally, they are cost-effective, environmentally friendly alternatives to traditional packaging methods.

Market Segmentation and Growth Trends

The rubber segment is expected to dominate the market by 2031, accounting for over one-fourth of the global market share in 2021. This dominance is attributed to the high initial adhesion buildup and good shear strength of rubber-based adhesives. Meanwhile, the acrylic segment is projected to witness the fastest CAGR of 6.7% during the forecast period, driven by its ability to withstand moisture and drastic temperature changes.

Among technology segments, the hot melt segment held the highest share in 2021, owing to its ease of application and compatibility with various materials. However, the UV cured segment is anticipated to witness the fastest CAGR of 7.1% from 2022 to 2031, thanks to its flexibility in shape development.

Regional Insights

Asia-Pacific emerged as the leading market contributor in 2021, holding more than two-fifths of the global market share. The region is expected to maintain its dominance, registering a rapid CAGR of 6.3% from 2022 to 2031. This growth is fueled by increased applications in sectors such as packaging, electronics, and construction.
