Prime determinants of growth

There is an increase in emphasis on maintaining cardiovascular health with the aging population and a growing focus on preventive healthcare. Policosanol, with its potential cholesterol-lowering and antiplatelet effects, is positioned as a preventive measure against heart disease and related conditions. Increased awareness of policosanol, through consumer education initiatives or marketing campaigns by supplement manufacturers,

contributes to the growth of the market. This factor is anticipated to drive the market during the forecast period. These factors together escalate the growth of policosanol. However, high costs of policosanol which in turn may restrain the growth of the policosanol market.

The Sugarcane segment to maintain its lead position during the forecast period

Based on source, the sugarcane segment accounted for the largest share in 2022, contributing to more than two-fifths of the global policosanol market revenue. The same segment is projected to register the highest CAGR of 7.2% during the forecast period. The demand for sugarcane is driven by factors such as population growth, change in consumer preferences, industrial uses, economic development, bio-based products, and the ongoing need for sugar as a food ingredient has enhanced the overall potential sales of policosanol market during the forecast period. Furthermore, policosanol, derived from sugarcane, has been studied for its potential health benefits. Sugarcane-derived policosanol is used to support overall cardiovascular health due to its cholesterol-modulating effects. It helps to reduce the risk of heart disease, stroke, and other cardiovascular conditions. This factor is expected to drive the demand for sugarcane derived policosanol in the medicinal sector.

The pharmaceutical drug segment to maintain its lead position during the forecast period

Based on the application, the pharmaceutical drugs segment accounted for the largest share in 2022, contributing to nearly two-fifths of the global policosanol market revenue. There is a greater demand for pharmaceutical products and treatments as global healthcare expenditure continues to rise. In addition, the aging population, the prevalence of chronic diseases, and advancements in medical technology have contributed to increased healthcare spending. This has led to a growth in the market for policosanol where it has been widely used to reduce LDL cholesterol and increase HDL cholesterol in the heart. This factor is expected to boost the market expansion during the forecast period. The dietary supplements segment is projected to register the highest CAGR of 7.3% during the forecast period

Asia-Pacific to maintain its dominance by 2032

Based on region, Asia-Pacific held the highest market share in terms of revenue in 2022, accounting for nearly half of the global policosanol market and is projected to register the highest CAGR of 7.5% during the forecast period. The Asia-Pacific policosanol market is anticipated to expand during the forecast period. India, China, and Japan are anticipated to contribute to the Asia-Pacific policosanol market. The region highlights high potential growth for policosanol, owing to the increase in the pharmaceutical sector where policosanol is used predominantly. It is used as antioxidant and anticoagulant agent in the formulation of drugs. This factor acts as one of the key drivers responsible for the growth of policosanol in the region.
