

Relaunch of VILI Post Top LED Lights with Selectable Wattage and Selectable Kelvin

The VILI is a classic-styled post-top LED light that has selectable Kelvin and wattage. Get the right amount of light on-site with the flick of a switch.

WORCESTER, MA, UNITED STATES, October 8, 2024 /EINPresswire.com/ -- Access Fixtures is thrilled to announce the relaunch of one of its [decorative street lighting solutions](#): the VILI LED post top lights, featuring selectable wattage and selectable Kelvin options. The VILI, a classic-styled post-top LED light has two versions; the [VILI 30/50/60 watts](#), producing 3,300, 5,500, or 6,600 lumens, and the [VILI 60/80/100 watts](#), producing 6,600, 8,800, or 11,000 lumens respectively at 110 lumens per watt. Being selectable, the watts used can be changed in the field with a simple flick of a switch on the post light. The Kelvin is also selectable and can be changed in the field, with options of 3000K, 4000K, and 5000K, adjusted with a simple flick of a switch. Here are three (3) ways the VILI post-top LED lights deliver adaptable and efficient outdoor lighting solutions.

VILI - LED Post Top Light, Selectable Kelvin and Selectable Wattage

Focused, Efficient Lighting: LEDs are positioned to direct light downward, maximizing visibility and minimizing wasted light. This targeted design enhances illumination in parking lots, walkways, and streets while reducing light pollution, making it ideal for large outdoor spaces.

Superior Light Quality: The anti-glare, textured polycarbonates lens ensures even light distribution without harsh glare, creating a comfortable environment. This enhances visibility and reduces eye strain, which is crucial for public and commercial areas requiring safe, welcoming lighting.

Customizable Power & Color: The VILI series offers two wattage options; 30/50/60w and 60/80/100w, so users can easily select the best output for their needs. Additionally, Kelvin options of 3000K, 4000K, and 5000K provide control over color temperature, allowing users to match existing lighting or create the desired ambiance. This flexibility ensures energy efficiency and optimized performance, tailored for various outdoor applications.

"With the ability to adjust both wattage and Kelvin, VILIs offer incredible flexibility for customers," said Access Fixtures CEO, Steven Rothschild. "In many cases, fixtures are chosen based on specs alone. With VILI, if different light levels or color temperatures are needed, users can make adjustments quickly and easily. This control allows VILI to adapt to changing needs, whether increasing brightness or matching the surrounding light tone, all with a simple switch adjustment on-site."

“

VILI allows quick on-site adjustments to light levels or color temperatures, adapting to changing needs by increasing brightness or matching surrounding light tones with a simple switch on the fixture”

Steven Rothschild, CEO

VILI - LED Post Top Light

The VILI Post Top LED Lights are available in two selectable wattage ranges; VILI 30w/50w/60w and VILI 60w/80w/100w delivering up to 6,600 and 11,000 lumens, respectively.
