Launch of New Dental Practice Management Software to Stay Competitive Remains Key Strategy

• Remit AI, dental insurance claims processing software was made available to multiple Dental Support Organizations (DSOs) in the United States in September 2024. This was achieved through a strategic investment in Zentist, the provider of Remit AI by KeyCorp, a leading financial service provider. This launch will help multiple dental institutions to streamline their insurance claim operations.

•	A new all-in-one platform for multi-location healthcare practices ranging from dental to veterinary was launched in June 2024. This platform named Weave was created to accelerate revenue cycle management in multi-location healthcare establishments and improve their operational efficiency as well.

Dental practice management software providers are projected to focus on new software launches to stay competitive. Dental practice management software companies are now branching out and also launching solutions that are usable beyond the dental application scope to capture the wider market of the expansive healthcare industry vertical.

Integration of Artificial Intelligence Taking Dental practice management software Market Growth to the Next Level

•	Curve Dental, a leading name in the global dental practice management software business teamed up with Patient Prism to improve integration of artificial intelligence and grow dental practices in January 2024. The partnership is aimed at promoting digitization and use of AI in the dental industry to maximize their business scope in the future.

•	A new dental practice performance system was launched by Maeva Dental Advisors in June 2024. Pronto! Dentistry's Practice Performance System provides insights through the use of artificial intelligence to optimize operations in multi-location dental clinics and dental service organizations.
Use of artificial intelligence is forecasted to present several new opportunities for dental practice management software companies in the future. From automating dental practice tasks to generating crucial insights for business optimization, use of AI will provide a multitude of new opportunities for dental practice management software market players in the future.
