Foot And Mouth Disease Vaccine Market Definition

Foot-and-mouth disease (FMD) vaccines are a medication used to boost the immune system's defenses in animals against foot-and-mouth disease. FMD is a severe and highly infectious disease affecting all cloven-hoofed animals, including cattle, sheep, goats, camelids, deer, and pigs. Animals with the foot-and-mouth disease have a high body temperature, followed by blisters, primarily on the feet and in the mouth.
