Growth Driver Of The Femtocell Market

Increasing applications of the smartphone have propelled the growth of the femtocells market. A smartphone is a type of portable device that integrates a mobile phone and a computer into one device. Smartphones are used for value-added services such as voice and data, software, video

conferencing, music downloads, and online games. The femtocell works with a cellular network provider to improve cellular portable mobile devices, particularly in areas where coverage by cellular systems utilising big cells is patchy and inconclusive.
