Functional beverages are nonalcoholic drinks which provides physical and mental health benefits and promote the state of health and well-being. Raw fruit, vitamins, herbs, vegetables, amino acid, probiotics, milk and some artificial additives are used to formulate the functional beverages.

Rising demand for sports and energy drinks among athletes and individuals engaged in intense physical activities majorly drives the functional beverages market growth. The growing athlete community and an increasing number of sportspersons in developing countries are some of the other factors driving the market. In addition, rising consumer inclination towards physical fitness and an increased number of fitness centers and health clubs are expected to fuel the market growth. Manufacturers are focusing on expanding their product portfolio by innovating new flavors with added health benefits. They are targeting different age groups owing to the popularity of sports drinks among teenagers and adults. The production of functional beverages with natural ingredients, such as natural sweeteners, is expected to propel the market growth by providing an opportunity to the manufacturers to add value to their products.

Furthermore, availability of alternative beverages such as green tea, ginger root tea, coffee, fresh juice, and others limits the growth of the functional beverages market. Moreover, consumption of coffee reduces the effect of caffeine present in energy drinks. Espresso coffee may taste stronger, however, it often contains less caffeine than drip coffee. Moreover, eliminating sugar from coffee or substituting it with stevia or honey prevents overdose of excessive sugar. Therefore, such alternatives hamper the global market growth for energy drinks, which in turn, decrease the growth of the functional beverages market.
