

ANY.RUN Launches Private AI Model for Enhanced Malware Analysis

DUBAI, DUBAI, UNITED ARAB EMIRATES, October 9, 2024 /EINPresswire.com/ -- [ANY.RUN](#), a leading provider of malware analysis and threat intelligence solutions, has announced the launch of a private AI model. It's designed to assist cybersecurity professionals in analyzing complex malware behavior while ensuring data privacy. This upgrade replaces the previous ChatGPT assistant and allows users to benefit from AI-powered explanations without the risk of sharing data with third parties.

The new AI model enhances both public and private analysis sessions within the ANY.RUN sandbox, providing immediate, AI-powered explanations and actionable insights. Users, especially those new to cybersecurity, will benefit from the tool's ability to break down complex data quickly and provide clear guidance on how to interpret it.

- □□□□□□□□ □□□□□□ □□□□□□: The AI model offers detailed explanations of malware behavior and infection chains.
- □□□□□□□□ □□□□□□ □□□□□□: It quickly scans command line activity to detect suspicious behavior and provides easy-to-understand insights.
- □□□□□□□□□□ □□□□□□□□ □□□□ □□□□□□□□□□: The AI clarifies why specific Suricata rules were triggered, helping users understand potential threats and attack patterns.
- □□□□□□□□□□ □□□□ □□□□□□□□□□□□□□: It identifies unusual traffic and provides context for malicious communications.
- □□□□□□□□□□□□□□ □□□□□□□□ □□□□□□□□: The AI model makes it easier to detect signs of malware persistence or system compromise.

Users can view all the generated reports conveniently through the AI Summary button.

The private AI assistant is now live and available to Hunter and Enterprise users, while the public

version can be accessed as part of the free plan. For more details, visit [ANY.RUN's blog](#).
