Factors influencing the growth of the global asset-based lending market:

The global asset-based lending market has witnessed significant growth due to the significant advantages provided by the asset-based finance that offers a business with increased liquidity. Moreover, asset-based funding acts as the best source of income for many firms, especially for non-investment grade corporations and organizations in the period of transition that cannot be eligible for a cash flow loan. Also, the continuous launch of attractive products by key players is expected to foster market growth during the forecast period. Furthermore, asset-based financing is easily approved with simple qualification criteria compared with a bank loan or business line of credit. This is expected to boost the growth of the market. However, small business owners are unable to raise funding in the equity market. By consolidating all financing on one loan, asset-based lending helps to access large sum of money for small businesses which is expected to create wide growth opportunities for the market in the coming years.

The latest trends in the market:

In recent years, continuous technological innovations have transformed the global asset-based

lending (ABL) industry. Several ABL lenders or firms have adopted various modern age technologies to improve their efficiency, competitiveness, and effectiveness. Currently, many lenders are using data analytics and artificial intelligence to collect, process, and analyze large and diverse data sets related to assets related to borrowers, assets, and help them identify risk involved in lending. Furthermore, these technologies help them automate and streamline their automate and streamline their operational and administrative tasks such as monitoring, valuation, and compliance, reducing their costs and errors.

Many firms have started using blockchain and smart contracts to create and manage transparent, efficient, and secure transactions in asset-based lending. Such high-tech contracts enable ABL lenders to verify and track the ownership, condition, and location of the assets and collateral involved in ABL and facilitate the collaboration and communication among various parties and stakeholders involved in the lending process.
