

Alta Audio Increases North American Dealer Base to 21 Locations

HUNTINGTON, NY, UNITED STATES, October 9, 2024

/EINPresswire.com/ -- Alta Audio, the company that combines advanced technology and outstanding aesthetics to create industry-leading home audio loudspeakers, announced today that it is now available in 21 dealers throughout the U.S., up from 18 dealers earlier this year.

“

We're enjoying one of our most exciting years to date, and it's due in no small part to our dealers on the front line, demonstrating and discussing the best of our recent introductions.”

Founder, CEO, and Product
Designer*

The three newcomers to the Alta Audio fold include HiFi Sound (MN), Leesburg Listening Room (VA), and Soundscape Stereo (CO).

“The signature of Alta Audio speakers is an infectious sense of scale and dynamics. The first time I heard a pair, I was totally captivated,” says Adam Golden, Owner, Soundscape Stereo. “The music flowing from the speakers is so engaging and fun that you totally forget the technical prowess behind them. Their efficiency allows pairings with a huge variety of amplifiers with great results, but they reward improvements along the whole signal chain.”

Among Alta Audio's accomplishments in 2024 is Aphrodite, a floor-standing speaker that is as technologically advanced as it is sonically pure. Aphrodite includes a custom-designed four-way driver complement, featuring one (1) titanium former 10" woofer with Alta Audio's patented XTL bass tuning; one (1) hex cone 8 3/4" titanium former lower midrange; two (2) hex cone 6" upper midrange drivers; and one (1) amorphous core transformer, and a high output ribbon tweeter.

In addition, Aphrodite, like most Alta Audio models, features the company's patented XTL II hybrid transmission line, a ported enclosure design that greatly increases power handling, lowers distortion, and extends bass frequencies. XTL technology often negates the need for an outboard subwoofer by applying sonic geometry to tune speaker cabinets as if they are musical instruments, delivering an accurate, fast, and powerful low frequency response.

“We're enjoying one of our most exciting years to date, and it's due in no small part to our dealers on the front line, demonstrating and discussing the best of our recent introductions,” says Michael Levy, Alta Audio's Founder, CEO, and Product Designer.
