Growth Driver of The Panty Liners Market

The growing number of working women is anticipated to drive the expansion of the panty liners market in the future. Working women are defined as those engaged in paid jobs, business activities, or professional services, irrespective of whether their work is full-time or part-time. The rise in working women can be attributed to better access to education, changing social norms, and increased opportunities for career advancement and financial independence. Panty liners are particularly popular among working women as they offer comfort, hygiene, and confidence throughout the day, especially during lengthy work hours and busy routines.
