## Key Drivers and Challenges:

- The market is experiencing growth driven by the rising adoption of consumer electronics, increased demand for optically clear adhesives (OCAs), and the surge in smart device sales.
- However, the presence of substitute products poses a challenge to market expansion.
- Opportunities for growth lie in the development of non-corrosive OCAs and advancements in activated covalent bonding technology.

## Market Segmentation:

- Device Structure: In 2020, the flat device structure segment held the largest market share, accounting for nearly 80%, and is expected to continue leading through 2030. The edge-curved segment, however, is expected to grow at the fastest pace with a CAGR of 9.3%.

- Thickness: The 100–200µm thickness segment dominated in 2020, contributing over 40% of the market share, and is predicted to exhibit the highest CAGR of 9.0% during the forecast period. Other thickness categories include 200–300µm, 300–400µm, and 400µm and above.

- Regional Insights: Asia-Pacific led the global OCA market in 2020, accounting for over two-fifths of the total market, with North America and Europe following closely. North America is projected to experience the fastest growth with a CAGR of 11.5% from 2021 to 2030.

Key Players: The leading companies analyzed in the report include:

- Dymax Corporation
- Henkel AG & Co. KGAA
- Delo Industrial Adhesives LLC
- Nitto Denko Corporation
- Dexerials Corporation
- Lintec Corporation
- The 3M Company
- Tesa SE
- Showa Denko Corporation
- Dow Inc.
