

# Unlocking Human Potential: Visionary Leaders in Health and Wellness to Headline Biohackers World Conference in Miami

*An exclusive event where global pioneers in science and technology explore groundbreaking innovations in personalized wellness and performance enhancement.*

MIAMI, FL, UNITED STATES, October 11, 2024 /EINPresswire.com/ -- The [Biohackers World](#) Conference & Expo will take place on October 26-27, 2024, at the Miami Beach Convention Center. The two-day event will bring together a diverse lineup of renowned experts and pioneers in health optimization, biohacking, and human performance. Biohackers World is a platform for exchanging insights on the most recent advancements in wellness science.

The event will host over 30 influential speakers, each providing unique perspectives on the convergence of technology, biology, and wellness. Attendees will gain a deeper understanding of genetic personalization, the use of technology for cognitive enhancement, and strategies for extending health span.

Some of the many distinguished speakers at the event include:

## [Philipp Samor von Holtzendorff-Fehling](#)

As the founder of Leela Quantum Tech, Philipp is a pioneering force in applying quantum energy for everyday health solutions. His innovations bridge the gap between advanced quantum science and practical wellness tools, enhancing vitality and longevity.

## [Clayton Thomas](#)

A detoxification expert and founder of The Root Brands, Clayton focuses on the removal of environmental toxins and the promotion of cellular health. His presentation will shed light on how detoxifying at the cellular level can boost overall health and well-being.

Susan Bratton

Known for her expertise in intimacy and relationships, Susan offers a distinctive perspective on integrating emotional and physical health. Her holistic approach to personal relationships provides valuable insights for those looking to optimize their overall wellness.

Kashif Khan

Founder of The DNA Company, Kashif is recognized for his cutting-edge research in genetics and personalized health. His talk will explore how personalized genetic data can be used to craft wellness strategies tailored to individual needs, driving advancements in personalized healthcare.

Jean Fallacara: Known as the Father of Lifespanning and a pioneer in the biohacking community, Jean combines science, technology, and art to push the boundaries of human potential. With a strong academic background from MIT and accolades such as "Top Biohacking Influencer," he offers a sophisticated approach to longevity and cognitive optimization.

Zane Griggs: An advocate for thriving at any age, Zane is a fitness and longevity coach and author of Kicking Ass After 50. His talk will cover the principles of maintaining vitality and physical fitness throughout different life stages.

The event will provide opportunities to explore the latest wellness products and engage with interactive exhibits that showcase the intersection of health, science, and technology. Focusing on longevity, mental performance, and holistic health, the event aims to present an integrated view of how modern advancements are reshaping the future of human optimization.

About Biohackers World Conference & Expo:

The Biohackers World Conference & Expo is committed to advancing the field of biohacking and wellness empowerment. The event seeks to inspire and support individuals in their quest for a healthier, optimized lifestyle through community engagement and expert-led sessions.
