Growth Driver Of The Cloud OSS BSS Market

The increase in 5G adoption is expected to propel the growth of the market going forward. The fifth-generation mobile network (or 5G) is a wireless technology aimed to give more users with higher peak data rates of multiple gigabits per second (Gbps), extremely low latency, better stability, massive network capacity, and a more consistent user experience. Service providers can offer a variety of use cases due to 5G, which necessitates automation of the OSS/BSS infrastructure from both the front-end and back-end.
