Growth Driver Of The Actinic Keratosis Treatment Market

The expanding geriatric population is expected to propel the growth of the actinic keratosis

treatment market going forward. The geriatric population refers to individuals who are elderly or aged, typically associated with advanced age, often defined as 65 years and older, and characterized by specific health considerations and challenges associated with the aging process. Actinic keratosis treatment in the geriatric population addresses precancerous skin lesions caused by sun damage, reducing the risk of skin cancer in elderly individuals.
