

Construction Glass Market Size, Share, Revenue, Trends, and Drivers For 2024-2033

*The Business Research Company's
Construction Glass Market Size, Share,
Revenue, Trends, and Drivers For 2024-
2033*

LONDON, GREATER LONDON, UNITED KINGDOM, October 17, 2024 /EINPresswire.com/ -- The construction glass market has experienced robust growth in recent years, expanding from \$113.58 billion in 2023 to \$123.19 billion in 2024 at a compound annual growth rate (CAGR) of 8.5%. The growth in the historic period can be attributed to urbanization and infrastructure development, energy efficiency regulations, population growth and housing demand, government initiatives for green buildings, safety and security requirements, global economic trends, increased renovation and retrofit activities.

What Is The Estimated Market Size Of The Global Construction Glass Market And Its Annual Growth Rate?

It will grow to \$14.45 billion in 2028 at a compound annual growth rate (CAGR) of 16.0%."

*The Business Research
Company*

The construction glass global market is projected to continue its strong growth, reaching \$166.87 billion in 2028 at a compound annual growth rate (CAGR) of 7.9%. The growth in the forecast period can be attributed to continued emphasis on sustainable construction, focus on circular economy principles, demand for antibacterial glass solutions, rise of prefabricated construction methods, smart cities and infrastructure development, emergence of

carbon-neutral construction materials, demand for fire-resistant glass solutions. Major trends in the forecast period include green building and sustainability, smart glass technology, innovations in coatings, increased use of laminated glass, supply chain challenges, architectural trends.

Growth Driver Of The Construction Glass Market

The increase in the building construction industry is expected to propel the growth of the construction glass market going forward. Building construction refers to the procedure of adding structure to a property with minor upgrades, such as room additions or restroom repairs. Glasses are used in engineering for building and architectural applications; as a result, increasing building construction increases the demand for construction glasses.
