Market Size, Trends, And Global Forecast 2024-2033

Increasing investments in exploration and production (E&P) activities are expected to propel the growth of the market going forward. Exploration and production activities refer to the process of looking for oil and natural gas deposits and taking measures to extract these resources from the earth for commercial sale. In exploratory drilling, well-coiled tubing is employed to conduct a drill stem test (DST) and stimulate a zone of interest, as it is a more cost-effective and traditional approach.
