Needless to say, the platform presents an unparalleled opportunity for thought leaders to establish their authority in the industry by speaking in front of the most senior gathering of financial sector professionals. For instance, the upcoming edition is set to host a cherry-picked community of 600+ delegates including the top C-suite profiles, senior managers, VPs, Directors and Heads from renowned financial institutions. Even key government officials will be seen gracing the 2-day event.

With a congregation such as this, any opportunity of showcasing one's expertise is being readily

grabbed by the thought leaders who are trying to leave a mark in their respective domains. The attraction of speaking at such a focused conference is not just limited to these profiles from the banking sector but is something that's also cherished by the exhibiting companies. These companies often appoint their most iconic personality to represent their organization at the conference and showcase their expertise with a wide range of case studies, groundbreaking innovations and use cases.

From WFIS' extensive list of exhibiting companies, the following will be seen taking active participation in the conference by taking on the most trending topics and decoding the same with their best-in-class experts - Ab Initio Software, Newgen, BML Istisharat, GrabDefence, Braze, Nucleus Software, iProov, Greyamp Consulting, Posidex, SAP, Trellix and others.

Showing his appreciation for Indonesia's banking sector, Sudhir Ranjan Jena, Co-Founder & CEO of the organizing body – Tradepass, expressed "This kind of participation from Indonesia's banking sector goes to show that its great financial institutions have moved from pledges and promises to the real space that demands action. These institutions are ready to take the archipelago's economy to the next level of growth and future preparedness. While this kind of active measure from the leading banks is a lesson for all, it signifies that there's going to be a tough competition ahead from the incumbent firms and the [fintech](#) providers will have to further up their game if they want to maintain a definite edge over competition."
