#### Key Highlights of V3.6:

- Robust Model Downloading

Winxvideo AI offers specialized AI models tailored to [enhance videos](#) and images with complex details, low quality, artifacts, or anime content, etc. The new update resolved the issues that prevented users from successfully downloading essential AI models. Users should now be able to download models without any issues. This ensures a seamless and uninterrupted workflow.

- Optimized Hardware Detection

The software now features a refined hardware detection process, accurately identifying a wider range of hardware configurations and their associated encoding/decoding capabilities. This means that the software can better adapt to different AMD/Intel/Nvidia systems, ensuring optimal performance for users with diverse hardware setups. For example, users with older hardware or specific graphics cards can now expect faster encoding/decoding processes.

- Upgraded Python Environment

Winxvideo AI V3.6 leverages an enhanced Python environment within its download engine. Users can now enjoy in faster media download speeds and improved stability.

- Enhanced Recorder Stability

The screen recording module has undergone enhancements to improve the overall stability and reliability. This resolves issues that previously caused crashes during recording sessions, as well as the occasional green screen artifacts in the output.

- iPhone 16 Support

The upgrade introduces full support for the newly released iPhone 16. Users can now seamlessly process and edit videos for this device directly.

“Winxvideo AI has been a game-changer, empowering users with unparalleled AI capabilities to transform their media,” said Jack Hand, CEO of Digiarty. “With V3.6, users can expect better performance, expanded compatibility, and a more streamlined workflow. This is just the beginning – we are committed to continually pushing the boundaries of AI-powered video and image processing.”
