

Xerafy Connected Tools: Finalist for Technology Achievement Award at MRO Asia Pacific 2024

SINGAPORE, October 18, 2024

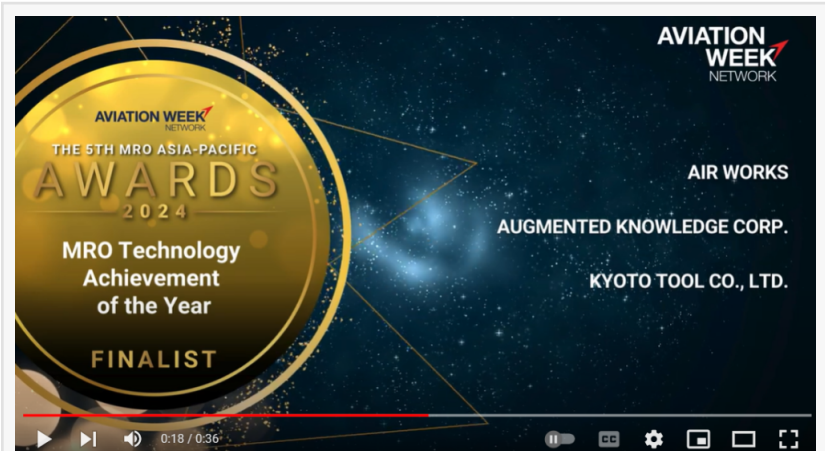

[/EINPresswire.com/](https://www.einpresswire.com/) -- [Xerafy](https://www.xerafy.com/), a leader in RFID technology and engineering, is thrilled to announce that its co-developed nepros ID connected tools with Kyoto Tool Co., Ltd. (KTC) have been named a finalist for the MRO Technology Achievement of the Year at MRO Asia Pacific 2024. This prestigious recognition underscores the innovative strides made in Maintenance, Repair, and Overhaul (MRO) tool management.

The Nepros ID tools leverage Xerafy's advanced [Connected Assets](#) RFID technology, setting a new standard of real-time tracking, automated inventory control, and operational efficiency. This collaboration between Xerafy and KTC represents a significant advancement in Foreign Object Debris (FOD) prevention, ensuring seamless compliance with industry regulations while minimizing tool loss and enhancing workflow optimization.

Driving Digitization in MRO

Xerafy has been at the forefront of RFID technology since 2010, driving innovation and delivering solutions that promote operational excellence across various industries. The company's commitment to digitization in MRO not only enhances safety and compliance but also empowers organizations to achieve greater operational efficiency.

With the ability to retrofit RFID technology into existing tool inventories, Xerafy's solutions are set to reshape [tool control](#) automation. The company is also advancing the use of RFID for

managing component work-in-process (WIP) and ensuring comprehensive tracking and authentication of MRO parts inventory.

Meet Xerafy at MRO Europe and Airshow China

As a key highlight of this achievement, Xerafy will also showcase the nepros ID tools at the MRO Europe event (October 22-24, 2024, Barcelona), and Airshow China (November 12-17, Zhuhai). Meet Xerafy to explore the transformative capabilities of the nepros ID tools and the broader Connected Assets platform.
