Key Companies in the Market:

- Arthrex, Inc.
- Arcuro Medical
- Stryker Corporation
- Johnson & Johnson
- Double Medical Technology Inc.
- Smith & Nephew plc
- Chetan Meditech Pvt. Ltd.
- Zimmer Biomet Holding Inc.
- CONMED Corporation
- Healthium Medtech

Market Segments:

On the basis of product, the all inside meniscal repair system segment contributed to the largest share of more than two-fifths of the global meniscus repair system market revenue, and is expected to retain its dominance by 2031. Also, the same segment would portray the fastest CAGR of 9.2% during the forecast period. This is due to the surge in the number of key players who manufacture all-inside meniscus repair systems and rise in the number of product launch and product approvals for meniscus repair systems.

Based on application, the complex tear segment garnered the highest share in 2021, holding around one-third of the global meniscus repair system market revenue, and is expected to retain its dominance by 2031. The same segment is projected to witness highest CAGR of 9.5% from 2022 to 2031. This is due to increase in the prevalence of knee osteoarthritis and sports injuries to knee. The report also analyzes vertical tear, horizontal tear, radial tear, and others segments.

In terms of end user, the hospitals segment contributed to the largest share of more than three-fifths of the global meniscus repair system market in 2021, and is expected to maintain progressive growth during the forecast period. The same segment is projected to witness highest CAGR of 8.9% from 2022 to 2031, owing to rise in number of hospitals and increase in the geriatric populations. The report also discusses ambulatory surgical centers, and others segment.

By region, North America accounted for the highest share in 2021, holding more than one-third of the global meniscus repair system market revenue, and is projected to rule the roost by 2031. This is due the higher adoption of advanced meniscal repair systems, rise in geriatric population

suffering from knee osteoarthritis, availability of well-developed healthcare infrastructure, and surge in prevalence of knee injuries in the region. The Asia-Pacific region, simultaneously, would portray the fastest CAGR of 9.7% during the forecast period. This is attributed to improvement in health awareness, rise in incidences of road accidents, increase in disposable income, development in healthcare facilities, and surge in healthcare expenditure in this region.
